

experience preschool™ CURRICULUM

Experience Preschool is a **research-based** curriculum that supports your child's rapidly growing curiosity. As your child participates in this **nationally recognized** program, they will:

- **Build friendship skills** and learn how to express their feelings.
- Have access to specialized books, science tools, art materials, games and math manipulatives to encourage **problem-solving and creative thinking**.
- Engage in daily routines and activities that support brain development while also building the **self-regulation and attention span** needed for long-term school success.

HANDS-ON LEARNING THROUGH PLAY

Your child's teacher will use books, puppets, music, blocks, puzzles and manipulatives to inspire a love of learning. While your child plays, they will naturally build 36 foundational skills. These skills are interwoven within 8 developmental domains:

- **social-emotional**
- **physical**
- **approaches to learning**
- **language and literacy**
- **math**
- **science**
- **social studies**
- **creative arts**

New Themes Every Month!

Every morning at Circle Time, your child's teacher will reveal the topic of the day. There are 20 topics related to the new thematic study every month. Throughout the day, they will investigate these topics through hands-on projects, art and music. We believe every child is an artist, engineer and tinkering genius. Get ready to see a lot of your child's hard work coming home and displayed on the walls in your school. We are excited to get to know your child's unique brilliance as we learn together, hand in hand.

Get ready
for a year filled
with curiosity
and growth!

Individualized Play and Learning for Continued Growth

As your child develops, the Experience Preschool Curriculum helps the teacher individualize the experiences and increase the challenges so your child is constantly learning at their unique pace. Your teacher will follow your child's progress with an embedded assessment tool.

Your child's brain doubles in size during their first year of life and is at 90% of its adult size by age 5. Research has shown that the quality of a child's experiences in the first few years significantly shapes how their brain develops into adulthood.

Experience Preschool Curriculum is designed to support you and the teacher to embrace your child's natural sense of wonder and help them reach their unique potential as they discovers our diverse and beautiful world.
